EXPERIENCE

Full Stack Developer at Skugal Technology Pvt.Ltd   (Feb 2022 - mar 2023)

- Worked on building newer generic **components** using **HTML, CSS, Javascript** and **ReactJs.**
- Worked on **responsive** design and developed an application that can be served to **desktop**, **tablets** and **mobile** users using React.js
- Extensively used **Git** for version controlling and regularly pushed code to GitHub.
- Experience in **RESTful API** to integrate server side to client side.
- Used **React-Router** to turn an application into a **Single Page Application.**
- Worked in **ReactJs components, Forms, events** and various **Npm/Yarn** Packages.
- Worked on Creating fully functional **Admin Dashboard** with nodejs and snowflake as backend
- Integrated live video stream with **amazon KVS** and **ZegoCloud**
- Worked on **AWS Lambda** functions for doing crud operation in Halo Project
- Fixed Multiple bugs on existing **Angular** projects

Intellemind Technology Pvt.Ltd   (July 2021- Oct 2021)

- Worked on **ReactJs Components.**
- Converted **Figma** design to react component using **Antd** Library
- Fixed critical bugs in the existing Wibash project
- Worked on **SEO** of Single page application with Node.js script using puppeteer.
- Used Git for version control

PERSONAL PROJECTS

React Web Application   https://confident-dijkstra-76c8ff.netlify.app/

- Developed a landing page for startup and SaaS businesses.
- Created a pricing card to show the pricing plan
- Used hash links for scrolling from one component to another.
- Used Bootstrap for UI design.
- Deployed the application using Netlify

- Trailers of movies popups on selecting the movies fetching data from **3rd party API**.

- Banner changes every time the page is refreshed.

- The Netflix bar appears when the page is scrolled down.

- Firebase is used for deployment of applications.

  Technologies: React, Bootstrap, Firebase, Github
